Environmental Policy

1. Introduction

LCC Projects Limited recognizes that sustainable development and environmental stewardship are key to the long-term success of our business and the well-being of the communities we serve. As a responsible infrastructure company, we are committed to minimizing the environmental impact of our activities, complying with environmental laws and regulations, and actively promoting eco-friendly practices in all aspects of our operations.

2. Objective

- To reduce the environmental impact of our operations by preventing pollution, minimizing waste, and conserving resources.
- To adhere to all relevant local, national, and international environmental laws and standards.
- To promote environmental awareness and practices that support sustainability within our company and the wider community.

3. Responsibilities

- **Management:** Ensure the environmental policy is effectively implemented, supported, and regularly reviewed. Provide resources and training to staff to meet environmental goals.
- **Employees:** Follow best practices for environmental protection, participate in environmental training programs, and identify opportunities to reduce waste, energy consumption, and emissions.
- **Contractors:** Ensure compliance with the Company's environmental standards and ensure subcontractors adhere to sustainability practices.
- **Environmental Officer:** Responsible for overseeing the implementation of the environmental policy, conducting audits, and ensuring compliance with environmental regulations.

4. Environmental Measures and Practices

- **Energy Efficiency:** Implement energy-saving technologies, minimize energy consumption, and invest in renewable energy sources where feasible.
- **Waste Management:** Ensure proper waste management, including recycling, disposal, and reducing construction debris. Reduce single-use plastics and promote the use of environmentally-friendly materials.
- **Water Conservation:** Implement practices to minimize water usage on sites, recycle water wherever possible, and ensure proper waste treatment for water discharge.
- **Pollution Prevention:** Adopt practices to reduce air, noise, and soil pollution, such as controlling dust on construction sites and minimizing hazardous material use.
- **Sustainable Materials:** Use eco-friendly, sustainable materials wherever possible in construction projects. Ensure that sourcing, transportation, and disposal practices minimize environmental damage.
- **Biodiversity Preservation:** Identify and mitigate the impact of construction on local ecosystems, and take steps to preserve biodiversity, including reforestation and habitat restoration programs where applicable.

5. Compliance with Legislation

The Company is committed to complying with environmental regulations and guidelines as set forth by the Government of India and local authorities, including:

- **The Environment Protection Act, 1986**
- **The Air (Prevention and Control of Pollution) Act, 1981**
- **The Water (Prevention and Control of Pollution) Act, 1974**
- **The National Green Tribunal Act, 2010**
- **EIA (Environmental Impact Assessment) Notification, 2006**

6. Monitoring and Review

Environmental performance will be regularly assessed through environmental audits, assessments, and KPIs related to waste reduction, energy consumption, and emissions. This policy will be reviewed annually to ensure that the Company is adopting the best possible environmental practices and is in line with the latest regulations and sustainability standards.
